

VIPPARTHI HASVANTH KUMAR

ASPIRING DATA ENGINEER | Python • SQL • ETL/ELT • PostgreSQL • Data Pipelines • Cloud

Hyderabad, Telangana | +91 70324 46354 | chintuhaswanth1421@gmail.com | LinkedIn: linkedin.com/in/vipparthi-hasvanth-kumar

PROFESSIONAL SUMMARY

AI & Data Science graduate with hands-on experience in Python, SQL, data processing, data transformation, API-based applications, and analytics through internships and projects. Experienced with structured and relational data, cleaning, transformation, and visualization. Familiar with ETL/ELT concepts, data pipelines, PostgreSQL, Apache Airflow, PySpark, Docker, and cloud technologies. Seeking an entry-level Data Engineer opportunity to build reliable data workflows, databases, and data-driven systems.

TECHNICAL SKILLS

Programming: Python, SQL, Java, HTML, CSS

Data Engineering: ETL/ELT, Data Pipelines, Data Transformation, Data Cleaning, Data Processing, Data Warehousing Concepts

Databases: PostgreSQL, SQL, Relational Databases

Data Processing & Visualization: Pandas, NumPy, Matplotlib, Seaborn

Data Engineering Technologies: Apache Airflow, PySpark, Docker

Cloud & Tools: AWS, Git, GitHub

Analytics & BI: Power BI, Power Query, DAX, Tableau, Excel

Machine Learning: Scikit-learn, Machine Learning

WORK EXPERIENCE

SYNTECXHUB — Data Analysis Intern | Remote | July 2026 – August 2026

- Analyzed business datasets using SQL and Python to clean, transform, and join relational data.
- Processed structured datasets for analysis and reporting.
- Built Power BI dashboards using Power Query, relationships, and DAX.
- Used SQL and Excel to analyze business performance metrics.

CODEC TECHNOLOGIES — Data Analytics Intern | Hybrid | June 2026 – July 2026

- Processed business datasets using Python, SQL, and Excel for data preparation.
- Performed SQL extraction using JOINS, GROUP BY, filtering, and aggregate functions.
- Prepared structured datasets for comparative analysis.
- Created analytical reports and visualizations for operational metrics.

NILTECH-EDU — Java Intern | Hyderabad | November 2024 – December 2024

- Developed Java applications using object-oriented programming concepts.
- Applied structured programming and fundamental software logic.
- Debugged existing Java code and investigated execution issues.
- Resolved technical issues through systematic troubleshooting.

PROJECTS

LinkedIn Message Personalizer | Next.js, React, Supabase, PostgreSQL, GitHub, Vercel

- Developed a full-stack web application for managing contacts and personalized LinkedIn outreach.
- Implemented user authentication and database-backed contact management using Supabase.
- Designed workflows for storing, updating, and managing contact information.
- Deployed the application on Vercel and maintained source code through GitHub.

Sales Performance Dashboard | Python, Pandas, NumPy, Power BI, Excel, Power Query, DAX

- Cleaned and transformed sales datasets using Pandas, NumPy, Excel, and Power Query.
- Created data relationships and DAX measures for revenue, profit, growth, and performance metrics.
- Designed interactive dashboards with KPI cards, slicers, and multi-dimensional visualizations.
- Presented sales trends and performance patterns through interactive reports.

Stock Market Tracker | Python, Flask, Pandas, Yahoo Finance API

- Developed a Flask-based web application to retrieve stock-market data using the Yahoo Finance API.
- Retrieved and processed market data programmatically for downstream analysis.
- Used Pandas to organize and transform retrieved data for analysis and visualization.
- Created visualizations to track stock-price movements and market trends over time.

GenThreat AI for Advanced Cyber Threat Intelligence | Python, Scikit-learn, Machine Learning

- Developed a machine-learning system to analyze and classify cybersecurity threat data.
- Performed data preprocessing and cleaning to prepare threat datasets for modeling.
- Applied feature extraction techniques to transform threat data into model-ready features.
- Implemented classification models using Python and Scikit-learn to identify threat patterns.

Secure Crypto-Biometric Authentication | Python, Hidden Markov Model, Machine Learning

- Developed a biometric authentication framework using Python and Hidden Markov Models.
- Applied HMM techniques to model biometric authentication patterns.
- Worked with machine-learning concepts for authentication pattern analysis.
- Structured the project around secure biometric authentication and pattern modeling.

UPCOMING — Cloud-Native E-commerce Data Warehouse & Automated ELT Platform | Data Engineering, ETL/ELT, Data Warehouse, Cloud

- Planned an end-to-end data engineering platform for e-commerce data workflows.
- Will focus on automated ELT processes for ingesting and transforming source data.
- Will implement a cloud-oriented data warehouse architecture for analytical workloads.
- Project will demonstrate data pipelines, transformation, orchestration, and warehouse concepts.

EDUCATION

B.Tech — Artificial Intelligence & Data Science | St. Martin's Engineering College | 2026 | CGPA: 7.19/10

Diploma — Mechanical Engineering | Mahaveer Institute of Science & Technology | 2022

SSC | Crescent High School | 2019

CERTIFICATIONS

Cisco – Data Analytics Essentials • IBM – Data Fundamentals • Deloitte Australia – Data Analytics Job Simulation • Tata – GenAI Powered Data Analytics Job Simulation • Internshala – Programming in Python with AI • Google Cloud – Introduction to Generative AI Studio • Deloitte Australia – Technology Job Simulation

ACHIEVEMENTS

College Chess Champion • 3rd Place – College Badminton Tournament • 3rd Place – College Kabaddi Tournament
